subsequently drying said nodule to convert it to ~~decorative~~-rigid foam having a decorative structure which is readily visible.
2. (Previously Presented) The method of claim 1 including
making said decorative arrangement by sequentially applying portions of at least some of said decorative elements to said nodule prior to complete drying of said nodule to convert it to said rigid foam.
3. (Currently Amended) ~~The method of claim 1 including~~ A method of making a decorative arrangement comprising
providing a wet foam,
partially curing said wet foam to create a nodule,
shaping said nodule,
securing a plurality of decorative elements to said nodule prior to said wet foam becoming rigid foam,
subsequently drying said nodule to convert it to rigid foam, and
placing said wet foam at least in part on a film having a release surface to which said foam will not bind.

4. (Original) The method of claim 1 including
effecting said securing of said decorative elements by securing at least
a portion thereof to the surface of said nodule.
5. (Currently Amended) ~~The method of claim 4 including~~ A method of
making a decorative arrangement comprising
providing a wet foam,
partially curing said wet foam to create a nodule,
shaping said nodule,
securing a plurality of decorative elements to said nodule prior to said
wet foam becoming rigid foam,
subsequently drying said nodule to convert it to rigid foam,
effecting said securing of said decorative elements by securing at least
a portion thereof to the surface of said nodule, and
wetting said foam prior to said partial curing.
6. (Original) The method of claim 4 including
securing said wet foam to a support structure.
7. (Original) The method of claim 6 including
providing said wet foam at least in part on said support structure.
8. (Currently Amended) ~~The method of claim 7 including~~ A method of
making a decorative arrangement comprising
providing a wet foam,
partially curing said wet foam to create a nodule,
shaping said nodule,
securing a plurality of decorative elements to said nodule prior to said
wet foam becoming rigid foam,
subsequently drying said nodule to convert it to rigid foam,

effecting said securing of said decorative elements by securing at least a portion thereof to the surface of said nodule,
securing said wet foam to a support structure,
providing said wet foam at least in part on said support structure, and
wetting said nodule prior to said subsequent drying.

9. (Original) The method of claim 4 including
employing as at least some of said decorative elements at least one
item from the group consisting of live vegetation, dry vegetation, and artificial
vegetation.
10. (Original) The method of claim 8 including
making a wreath as said decorative arrangement.
11. (Original) The method of claim 4 including
making a swag as said decorative arrangement foam.
12. (Previously Presented) The method of claim 1 including
employing as said wet foam a foam which when partially cured will
secure said decorative elements in said arrangement.
